TITLE : AC TYPE PLASMA DISPLAY PANEL
AND MANUFACTURE THEREOF

ABSTRACT : PURPOSE: To restrain a secular change of an electric discharging characteristic caused by a magnesium oxide film for protecting a dielectric layer so as to stabilize displaying and prolong a lifetime in an AC type plasma display panel(PDP) and a method for manufacturing the same.

CONSTITUTION: A <111> orientation film of magnesium oxide as a protecting film 16 for covering a dielectric layer 15 against a discharging space 30 is formed by a vacuum deposition method, where deposition is carried out in the oxygen atmosphere, or an ion assist deposition method, where an ion beam is radiated on a deposition surface.
